SUPPLEMENTAL STATEMENT OF WATER DIVERSION AND USE

If the information below is inaccurate, please line it out in red and provide current information.
Notify this office if ownership or address changes occur during the coming year.

Please Complete and Return This Form by **JULY 1, 2005.**

*If the mail recipient's name, address or phone No. is wrong or missing, please correct.

Owner of Record: LONE TREE MUTUAL WATER COMPANY;

PRIMARY CONTACT OR AGENT FOR MAIL & REPORTING:
LONE TREE MUTUAL WATER COMPANY

STATEMENT NO.: S010411
CONTACT PHONE NO.: (209)722-3997

**5002 W EL NIDO RD
EL NIDO, CA 95317**

Source Name: SAN JOAQUIN RIVER

Tributary To: SUISUN BAY

County: Merced

Diversion Within: NW 1/4 of NE 1/4 Section 31, T09S, R13E, MB&M * *see Reverse for additional*

Year of First Use: 1955

Parcel Number:

- A. Water is Used Under: Riparian claim Pre-1914 right _____ Other (explain): _____
- B. Year of First Use: (Please provide if missing above) _____
- C. Amount of Use: Enter the amount (or the approximate amount) of water used each month, using the table below.

Amounts below are in: Gallons Million Gallons (MG) Acre-feet (AF) X Other

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2003			190					150	150	150		1322	1962
2004	500	500	150	150	150	150	150	150	150	71		326	2447
2005			182	2500	1500	4500	4500					2293	14995

- D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.
Irrigation 2003: 11,101 2004: 11,050 2005: 10989 acres; Stockwatering _____; Domestic _____
Other (specify) _____

E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES NO _____
Describe any water conservation efforts you have initiated: All drainage water ("tailwater") is recovered and reused.

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree, which unreasonably affects such water for other beneficial uses? YES ___ NO
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:
 Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:
 Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES ___ NO ___

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES NO ___
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES ___ NO ___

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Dear Mr. Park:

STATEMENT OF WATER DIVERSION AND USE #10411

Pursuant to your letter of March 20, 1992, our records will be updated to show Statement 10411 in the name of Lone Tree Mutual Water Company.

The next Supplemental Statement reporting form for the above-numbered statement will be sent in January 1993 to the owner of record.

Thank you for your cooperation.

Sincerely,

RE: Director statement No. 010411 (Newhall Land & Farming Co.)

Dear Sir:

Enclosed please find the recorded grant of easements from Newhall Land & Farming Co. to Lone Tree Mutual Water Company, which grants to Lone Tree Mutual Water Company the sole right to exercise Newhall Land & Farming Co.'s riparian and other water rights as Newhall's agent.

Please Forward future 3 year supplemental statements of Water Diversion and Use to Lone Tree Mutual Water Company at the address above.

Sincerely,

George Park

GRANT OF EASEMENTS, RIGHTS-OF-WAY AND WATER RIGHTS

THE NEWHALL LAND AND FARMING COMPANY, a California limited partnership, hereby grants to LONE TREE MUTUAL WATER COMPANY, a California non-profit mutual benefit corporation existing under the laws of the State of California, all those easements and rights-of-way hereinafter more particularly described which are located upon Parcels 1 - 14 of that certain Parcel Map No. 3494, as recorded on November 19, 1990, in the Official Records of Merced County in Book 68, of Parcel Maps at Pages 27 - 43. Said Parcels 1 - 14 are hereinafter collectively referred to as "Parcels".

Grantor further grants to Grantee all appropriate and other surface water rights appurtenant to the Parcels, reserving, however, to Grantor all riparian and other water rights which cannot be severed from the Parcels (the "Non-Severable Rights") which are appurtenant to the Parcels, if any; provided, that the sole right to exercise the Non-Severable Rights on behalf of Grantor, and the sole right to distribute water to the Parcels attributable to the Non-Severable Rights is hereby granted to Grantee as Grantor's agent. It is the express intent of Grantor that nothing contained within this grant is to be deemed a conveyance of any Non-Severable Rights, and this Grant is to be so interpreted.

Grantor further grants to Grantee all rights to drill for, develop, produce, extract, utilize and distribute groundwater from the Parcels, reserving, however, to Grantor the right to develop and utilize domestic wells for groundwater to be extracted from and utilized upon the Parcels, not, however, to exceed one such domestic well for each 20 acres and not to exceed a maximum production of 150 gallons per minute per well.

Grantor further grants and conveys to Grantee in an "as is" condition, all wells, pumps, casings, motors, pipelines, electrical panels, canals and necessary appurtenances thereto owned by Grantor, situated upon and related to the easements and rights-of-way granted herein.

OR AS TO ITS EFFECT UPON THE TITLE.
A

VOL. 2894 PAGE 680

The easements and rights-of-way hereby granted from Grantor to Grantee over and upon the Parcels are located as shown on the maps attached hereto and marked Exhibit A. The easements for well sites, lift pumps, and proposed wells as shown on Exhibit A are square, with dimensions north, south, east and west of 100 feet each, with the well site, proposed well site or lift pump being in the center of said square. Some lift pumps also include an easement for a sump in the dimensions as shown on the Maps attached hereto as Exhibit A. The centerlines for the canals, drains, sloughs and pipelines shown on Exhibit A, and the location of the well sites, lift pump sites and prospective well sites are approximate. The dimensions for the easements and rights-of-way for water conveyance and drainage, unless otherwise noted differently on Exhibit A, are as follows:

<u>Facility</u>	<u>Distance From Each Side to Centerline Except as Noted</u>
Delivery Canal (earthen).....	30'
Delivery Canal (concrete).....	20'
Pipeline (buried).....	20'
Drain.....	20'
Tile Drain (buried).....	20'
Sloughs - Sand Slough.....	65'
Sand Slough Extension.....	35'
Chamberlain Slough.....	60'
Deep Slough.....	40'

Grantor grants to Grantee the exclusive right-of-way and easement over and upon those respective locations shown on Exhibit A and identified as easements to:

- (a) Drill and install, operate and maintain wells for water, drainage, monitoring or other purposes, within any well site, proposed well site, lift pump site, sump, delivery canal (earthen or concrete), pipeline, drain, tile drain or slough as shown on Exhibit A.
- (b) Construct, maintain, operate, reconstruct or enlarge irrigation and drainage ditches or pipelines for irrigation and drainage purposes, for the transportation of water, either naturally existing, or brought thereto and to utilize said drainage and irrigation rights-of-way for borrow and spoil purposes and access roads.
- (c) Construct, maintain, operate, reconstruct or lay pipelines, culverts or power lines, either surface or subsurface, reserving to Grantor the right to utilize the surface of any pipeline right-of-way as shown on Exhibit A attached for farming, provided that

Grantee shall have access to such pipeline right-of-way for installation, maintenance, repair or replacement of the pipe or pipelines; subject only to the obligation to compensate Grantor, its successors and assigns for any crop damage resulting therefrom.

(d) Construct, maintain, operate and reconstruct sumps at the locations shown as sump easements, for purpose of transporting water to lift pumps.

Grantor further grants to Grantee a right of access to the well sites, proposed well sites, lift pump sites, delivery canals, pipelines, drains, tile drains, sumps and sloughs as shown on Exhibit A, for the purpose of installation, repair or replacement of such facilities over and upon existing surface roadways, including, but not limited to, those certain 20 foot nonexclusive ingress and egress easements shown on the above-referenced Parcel Map or, if none exist, then by the most convenient route from the nearest roadway, in which event Grantee shall compensate Grantor, its successors and assigns, for any crop damages resulting from such access to the right-of-way shown on Exhibit A attached hereto, where existing roadways are not able to be utilized.

Grantor reserves the right to utilize the surface of any tile drain or underground pipeline easements shown on Exhibit A attached, for farming purposes with the right to be compensated for crop damage to the extent access is required by Grantee within such easements for installation, maintenance, repair or replacement of the tile drains with appropriate compensation to Grantor for any crop damage resulting from such surface access by Grantee.

Grantor further grants to Grantee, expressly subject to the rights granted to the Sacramento and San Joaquin Drainage District, a public agency, by virtue of various deeds, indentures and other documents, recorded in the Official Records of Merced County, pertaining to land designated as the "Eastside Bypass and any appurtenances thereto," an easement as shown on page 10 of Exhibit A, with dimensions of 200 feet by 700 feet, for the purpose of diverting water from the San Joaquin River through a concrete weir structure, through gates, pipes, ponds and other necessary appurtenances from the San Joaquin River to Sand Slough, and for the maintenance, repair, replacement and operation of such weir structure, gates, pipes, ponds and other appurtenances. Grantor further conveys to Grantee, all of Grantor's rights to said concrete weir structure, gates, pipes and other appurtenances located in said easement area. Grantor makes no representations or warranties with regard to the ownership of said concrete weir structures, and only grants to Grantee Grantor's rights, if any, to said structures.

Subject to Grantor's reservation of Non-Severable Rights above, and subject to the rights granted to the Sacramento and San Joaquin Drainage District, a public agency, by virtue of various deeds, indentures and other documents, recorded in the Official Records of Merced County, pertaining to land designated as the "Eastside Bypass and any appurtenances thereto," Grantor hereby grants to Grantee easements lying within the Eastside Bypass

for the purpose of ingress and egress to water flowing in said Eastside Bypass and for the purpose of installing and maintaining pumps within said Eastside Bypass and the construction and maintenance of pipelines and ditches within said Eastside Bypass for the purpose of transporting water from said Eastside Bypass to the canals and pipelines shown on Exhibit A. The exact locations of said easements are not shown on Exhibit A attached hereto, and said location shall be as determined, from time to time, by Grantee, with Grantee attempting to minimize to the extent reasonably possible, any interference with Grantor's use of said Eastside Bypass for farming and grazing purposes.

Promptly upon the installation, maintenance, repair or replacement of any pipeline or pipelines, Grantee shall fill in all excavations so that at all times thereafter the surface of said easement and other areas of Grantor's land used by Grantee in connection with the installation, maintenance, removal or replacement of the pipeline shall be placed in the same or better condition than presently exists, and Grantee shall do what need be necessary to reenter and refill excavation in areas which subside as a result of the excavations, and to cause the surface of the area so entered to conform with the grade and evenness of the remaining property of the Grantor.

Grantee agrees to indemnify and hold Grantor, its heirs, successors and assigns harmless against any loss (including costs and attorney's fees) sustained by Grantor, its heirs, successors and assigns, which said loss or damage is proximately caused by the existence or operation of any wells, pumps, pipelines, canals, drains or tile drains, and the contents thereof whether such loss or damage arises out of the claims for injury, wrongful death, negligence, strict liability or liability imposed by virtue of federal, state or local ordinances, and which said loss or damage is not the result of the negligence or willful act of Grantor, its heirs, successors and assigns. It is the intent of Grantee to indemnify and hold Grantor harmless from any and all loss or damage arising out of or in any way related to the existence of said canals, pipelines and drains, and the contents thereof, other than loss or damage which is the proximate result of the negligent or willful act of Grantor, its employees, heirs, successors or assigns.

It is the intent of this grant to transfer the Grantee all of the rights and facilities pertaining to water service for the lands within Grantee's service area which are currently in the ownership of Grantor and applicable to the Parcels. It is further the intent of this grant to transfer to Grantee all easements described or referenced in the attached Exhibit A regardless of whether such easements are otherwise described herein. All such easements are hereby granted to Grantor together with all rights necessary or incidental thereto, to the end that Grantee is to possess all rights necessary in order for Grantee to provide water service to all the lands within Grantee's service area.

Grantor further quitclaims to Grantee whatever right, title or interest Grantor may have (if any) to that certain pipeline shown as Detail B on Parcel 9 of Exhibit A attached hereto lying under the San Joaquin River.

Grantor makes no representations or warranties that Grantor has any right, title or interest in or to said pipeline, or that Grantor has any valid enforceable easement with regard to said pipeline.

This grant is made upon the condition to which the Grantee by acceptance and recordation of the grant consents and agrees that should Grantee or its successor decide to sell or otherwise dispose of water available to Grantee for use on lands other than those described as Parcels 1 - 14 of Parcel Map No. 3494 referred to above, then, prior to selling or transferring said water, Grantee shall first offer to sell or transfer said water to Grantor so long as permitted under the then existing rules and regulations, upon the same terms as the proposed sale or transfer, and Grantor shall have 30 days after receipt of said written notification to advise Grantee that Grantor wishes to purchase or accept said water upon said terms and conditions. Should Grantor so fail to notify Grantee that Grantor declines to purchase said water, then Grantee may sell or otherwise dispose of said water in its discretion. This is intended to be a covenant in gross, and the burdens of this covenant shall be binding upon the heirs, successors and assigns of Grantee.

If any term of this grant is held by a court of competent jurisdiction to be void or unenforceable, the remainder of the grant shall remain in full force and effect and shall be not affected. The parties hereby declare that they intend and desire that the remaining parts of this grant shall continue to be effective without any part or parts that have been declared invalid.

This instrument, and the rights and obligations provided for herein, shall be binding upon and shall inure to the benefit of the respective heirs, personal representatives, successors and assigns of the parties hereto.

Other (specify) _____

E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ___ NO ___

Describe any water conservation efforts you have initiated: _____

b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)

Reductions in consumptive use:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES ___ NO ___

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ___ NO ___
- b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)
 I have data to support the above surface water use reductions due to wastewater reclamation. YES ___ NO ___

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES ___ NO ___
- b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)
 I have data to support the above surface water use reductions due to conjunctive use efforts. YES ___ NO ___

I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

**Attachment to Statement
of Water Diversion and Use**

In 1988 and 1989 surface diversions were less because of dry year conditions. In these years more groundwater was pumped to provide water to approximately the same irrigated acreage.

Sacramento, California 95810

Dear Sirs:

Enclosed find Supplemental Statement of Water Division and Use No. 010411 covering 1984-1986.

Please note that the primary point of diversion is one quarter - quarter section off from the description imprinted on the Supplemental Statement of Water Diversion and Use form. It should be: Northwest $\frac{1}{4}$ of Northeast $\frac{1}{4}$ Section 31, Township 9 South, Range 13 East, MDB&M, and has been corrected on the Statement enclosed.

Requesting correction of your records to reflect this change. Also note that all previous Statements reflected the description above as well (e.g. Initial Supplemental Statement of Water Diversion and Use filed June 17, 1981, and 1981-1983 Supplemental Statement of Water Diversion And Use No. 010411).

Thank you for your assistance.

Sincerely,

Kevil Quinley
General Manager - Farming
